

Identifying climate-related risks and opportunities

Understanding your climate-related risks and opportunities is the first step to implement Sustainability Reporting

Use this checklist to identify key areas of climate risk and opportunities for your organisation.

Supply Chain	Customer Demand
<ul style="list-style-type: none"> • How will your locations be impacted by the physical impacts of climate change? • How much plastics and oil based products including fuels do you use in your production process? • Are you a large consumer of electricity? • Do you use large volumes of water and where is that water sourced from? • Do you have any other known sources of global warming associated emissions including refrigerants and methane from animals? 	<ul style="list-style-type: none"> • How will the changing climate and social norms impact demand for your product? • If supply chain analysis indicates increased costs, how will demand react to higher prices? • What efficiency issues do your customers face through use or disposal of your product? • What climate related questions are you getting from potential clients in tender requests?
Regulation	Innovation and stakeholder concerns
<ul style="list-style-type: none"> • Are you a high carbon emitter such that you would be significantly impacted by a carbon trading scheme? • What areas of climate regulation would have a significant impact on your organisation? 	<ul style="list-style-type: none"> • What innovation is happening in your industry? • Are employees demanding climate action?

Identifying your climate related risks and opportunities can be challenging. Contact your Local Moore Australia Advisor if you would like them to facilitate a workshop with your organisation to assist you in identifying your climate-related risks and opportunities and then start to develop a strategy to respond to them.
